Book Donations

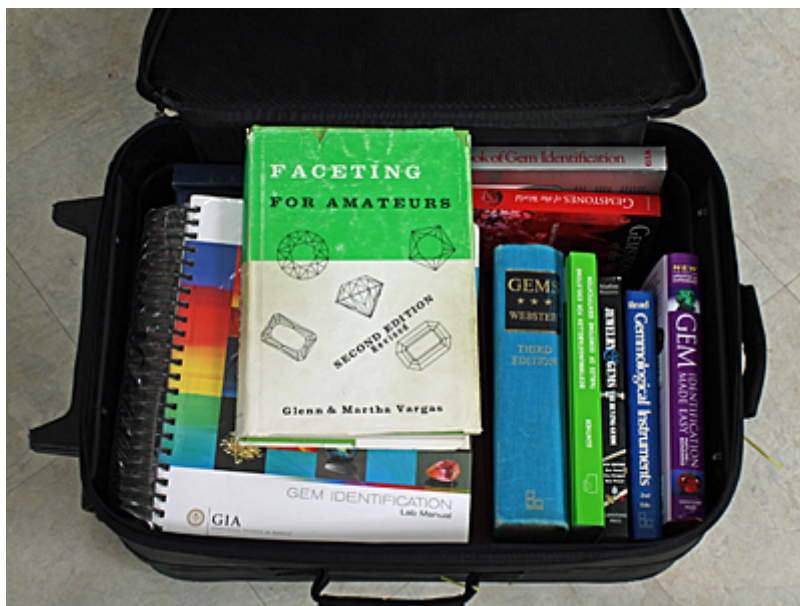

As many of you have followed our adventures in East Africa, you already know that we have our share of fun along the way. We also take what we do there quite seriously. Roger and I are always looking for ways to give back to the people of the countries that contribute so much to us.

In two weeks, Roger leaves for Tanzania and Kenya. Roger hopes to deliver a collection of faceting-related books to the Arusha Gemmological and Lapidary School. We support the Lapidary School financially through [The Devon Foundation](#) as well as with books and supplies.

In 2012 we delivered a varied selection of gemological books. These books have been extremely helpful to the students as the school had very few books. When a student wanted to have the information themselves they made a copy by hand...yes, writing it out by hand with a pencil.

For his June 2013 trip we want to focus on faceting-related books. If you have some faceting books stored away gathering dust, this is the time! We would really appreciate your book contribution. Books can be shipped to us in Michigan and Roger will hand deliver the books while in Tanzania.

We are especially interested in books from:
John Sinkankas
Glenn and Martha Vargas
Broadfoot & Collins

Jeff Graham
Long & Steele

We will take other books as space allows. Email and let us know what you have to donate. Thank you for your consideration!
